Quayle Action

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the needle of claim 6 and 15 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 3763

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

3. This application is in condition for allowance except for the following formal matters:

Claims 2, 3, and 12 appear to be improper because they fail to further limit the subject matter of claim 1.

It is suggested that claims 2, 12, and 13 be either amended to follow the format of claims 4 and 13 (addition of further limitations) or cancelled. If claims 2, 12, and 13 are cancelled, then claims 4 and 13 should be amended to read:

--A drug delivery device, said device comprising a pen-type device and further comprising the drive mechanism as recited in claim 1.

Claims 5, 6, and 7 should thus be amended to depend from claim 4 (if amended as above.)

Claims 10 and 19 only recite a single method step. Claims 10 and 19 should be amended to read:

--A method of manufacturing the drug delivery device, comprising the steps of providing the drive mechanism according to claim 1, and assembling the drive mechanism.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 6,221,046 by Burroughs et al. discloses a Recyclable Medication Dispensing Device. US Patent 6,004,297 by Steinfeldt-Jensen et al. discloses an Injection Syringe. US Patent 5,800,388 by Schiff et al. discloses a Plunger/Ram Assembly Adapted for a Fluid Injector. US PGPub 2002/0029018 by Jeffrey discloses a Materials Delivery Device.
